

200

300

Oil Type Mold Temperature Controller use oil as heating media to realize heat exchange by indirect cooling. Oil type has its superiorities with wide temperature controlled range and excellent heat stability. Standard heating temperature can reach at 200, while high temperature type can reach 300.

- Safety Protection and Indication System
- Power lock phase protection
- High flow of oil pressure for protecting mold cavity
- Pump reverse protection and indicating lamp
- Water shortage protection and indicating lamp
- Overheat protection and indicating lamp
- High pressure
- Hot oil bypass pressure release loop
- Forced cooling
- Abnormal temperature alarm
- Abnormal alarm buzzer
- Oil shortage protection and indicating lamp

oil type mold temperature control

- Thermocouple for connecting external wiring
- Thermometer for return oil
- Leakage protection switch
- Abnormal voltage indication switch
- Filter plug

Feature and scope of the product does not guarantee the product attributes only for reference. Our scope of delivery and services provided are based solely on the terms of delivery and services provided are based solely on the terms of the contract. Technical data and illustration are only for reference. We reserve the rights of changing.
